

DIABETIC GASTROPARESIS STUDY

Have DIABETES and GASTROPARESIS?

Gastroparesis creates a feeling of bloating, nausea, vomiting, pain in the abdomen, early fullness, heartburn, loss of appetite and the list goes on. Sounds like something you're dealing with?

If so, Manassas Clinical Research is conducting a Research Study with an Investigational Medication.

TO QUALIFY, YOU MUST:

- Be diagnosed with Type 1 or 2 Diabetes for 5 years.
- Be Male or Female and at least 18 years of age
- Have experienced these symptoms for at least 3 months and experienced at least 2 vomiting episodes in the last 2 weeks.
- Be willing to participate in a 16- week study and make 7 clinic visits

QUALIFIED PARTICIPANTS WILL RECEIVE:

- Study-related medication at no cost
- Compensation for time and travel may be provided
